

## APM Terminals Mumbai

### TRADE ADVISORY

#### Traffic congestion on approach roads to/from GTI

Date : 2<sup>nd</sup> April 2015

Place : Nhava Sheva

Dear Valued Client,

Greetings from APM Terminals Mumbai.

We would like to thank you for your support that has enabled us create a new handling throughput record of 2.01 million TEU's for Fiscal year 2014-15. Also with your support, for the last quarter - Quarter 1 2015, we have recorded the highest quarterly throughput of 516,826 TEUs.

We have noticed that for the past few days there is traffic congestion on the approach roads to the port. This is being caused by dumper traffic movement which are involved in land reclamation for the new 330 meter and JNPT 4<sup>th</sup> terminal. There is a daily movement of close to 1,500 dumpers which is expected to increase in the coming days. This dumper movement is using the existing and already limited approach road infrastructure to the port. Furthermore, one lane of the approach road towards GTI has been barricaded by JNPT exclusively for dumper movements. This has been done to ensure that dumper traffic does not mix with the container traffic, however this is adversely impacting our gate movements.

We deeply regret the inconvenience caused and are addressing the matter with the authorities.

We look forward to receiving your continued understanding and support.

Kind Regards,

Suchit Kapoor
