

13 June 2013

Dear Valued Clients,

Greetings from APM Terminals Mumbai!

While more than 3/4<sup>th</sup> of the cargo at Nhava Sheva moves via roads i.e. 3 million TEUs and above, the Collector's office and JN Port along with terminal operators are committed to facilitate continuous entry/exit of cargo. The response has been very encouraging from all stakeholders.

To ensure your containers move faster to the terminal's gates, kindly follow three simple steps:

1. Advise tractor trailer drivers to carry proper and valid documentation;
2. To ply through a **dedicated approach road for GTI bound cargo**;
3. Avoid haphazard parking of trailers on roads leading to the terminal.

In most cases drivers with incomplete/without documents enter the queue. These trailers end up blocking the road for others with valid documents resulting in the latter missing his gate cut-off. If the above three points are adhered to, your cargo will get quick and efficient evacuation.
