

APM Terminals Mumbai is committed to ensuring safety of all personnel entering its premises. The terminal investigates each and every incident reported and/or observed to arrive at the root cause of the same and ensure corrective actions are undertaken to avoid a similar incident in future.

Our investigations reveals three major reasons behind truck driver centric road accidents. These are Fatigue, Poor Visibility & Lack of Safety Awareness.

This advisory is aimed to address following issues.

1. **Fatigue**

All Container Freight Station ('**CFS**') operators are requested to deploy adequate drivers in their transportation fleet. We recommend a maximum of 12 working hours per day for each driver. Following such a recommendation will ensure that your assigned trailer driver gets sufficient rest and thus reduces the chance of any fatigue related safety incident.

2. **Poor Visibility**

All CFS operators and their authorized transporters are requested to fix three-way mirror on their trailers. This will improve visibility around the trailer.

3. **Lack of Safety Awareness - Safety induction training**

APMT Mumbai's HSSE division extends safety training onsite at the CFS/s and have done so for many CFS/s in the vicinity of JNP Port. Should your esteemed CFS not have undergone a training or would appreciate retraining of their drivers in the fleet and/or their outsourced transporters, we request you to kindly provide us with a date and time to schedule the same in the month of January 2017. Thereafter, the terminal will depute our safety trainer to your location to complete a driver safety induction training.

Additionally APMT Mumbai also has a training center in our Pre Gate parking which is open 24X7 and any driver can undergo a free safety induction training. The safety induction training takes about 20 minutes

All drivers that have completed the safety induction training shall be issued an induction card.

Please be advised that effective 1st Feb 2017, only drivers that are in possession of a valid induction card may be permitted to gate in at APMT Mumbai. Drivers' not in possession of induction card will be permitted to operate within the terminal premises only after the safety induction is done.

Please contact Nitin Mhatre (022-66811101) & Safety Executive (022-66811099) for further queries.

We solicit your complete support and assistance, as always, in making APMT Mumbai safe for everybody.
